José Mota

Software Developer

Software Developer with 3 years of experience specializing in the creation of modern, fast, and efficient web interfaces. Proficient in key technologies such as React.js, Next.js, TypeScript, and Tailwind CSS, delivering scalable and secure solutions. Strong background in routing, authentication, accessibility, software testing, and the application of clean architecture principles like SOLID and design patterns. Focused on optimizing user experience and ensuring high-performance architectures.

WORK EXPERIENCE

Software Development Engineer (Temporary)
Cevaldom
10/2025 – 06/2026 · Santo Domingo, Dominican Republic (Remote)

- Participated as a Frontend Developer in the redesign of the company's core system interfaces, including the authentication module.
- Developed custom components utilizing CSS, Java, JSF, and PrimeFaces with a primary focus on enhancing user experience.

Front-End Developer (Full-time)
Banco Ademi
01/2025 – 04/2025 · Santo Domingo, Dominican Republic (Remote)

- Participated in the redesign and development of an internal bank module, allowing staff to efficiently access key information regarding branches and business officers.

Front-End Developer (Full-time)
K3D Technology
10/2023 – 12/2024 · Santo Domingo, Dominican Republic (Hybrid)

- Developed the complete interface of an Integrated Operational Data System using Next.js, achieving a highly responsive and optimized platform.
- Achieved 100% adoption among internal users, significantly improving operational efficiency through the application of UI/UX best practices.

React.js Developer (Trainee)
Applaudo Studios
02/2023 – 04/2023 · El Salvador, San Salvador (Remote)

- Developed over 10 different web applications from scratch using core technologies including React.js, TypeScript, Tailwind CSS, SASS, and Redux.js.
- Deepened knowledge of browser JavaScript execution, advanced React concepts, accessibility, security, testing, and routing.
- Implemented advanced programming concepts such as SOLID principles, design patterns (Singleton, Factory Method), and methodologies like Atomic Design.

Software Developer (Intern)
CyberWarrior
08/2022 – 02/2023 · Boston, Massachusetts, United States (Remote)

- Collaborated within a 5-person team to develop an e-commerce platform featuring real-time cryptocurrency tracking, utilizing a WebSocket API and a React.js front-end.
- Independently designed and developed the entire UI and business logic from scratch for a cybersecurity testing web platform, selecting the necessary architecture and technologies.

SKILLS & COMPETENCIES

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, SASS, Bootstrap, Ant Design, JSF & PrimeFaces, Angular.
- **Backend & Databases:** Node.js, Express.js, PHP, Java, C# & .NET, Python, SQL, Oracle APEX.
- **Tools & Methodologies:** Git, GitHub, GitLab, Figma, Zustand.
- **AI & Productivity Tools:** Cursor, Claude Code, GitHub Copilot, OpenCode, Codex, ChatGPT, Perplexity, Gemini.

EDUCATION

Software Development Technologist
Instituto Tecnológico de las Américas (ITLA) · 2019 - 2023

LANGUAGES

- Spanish (Native)
- English (C1)
